Domain 2E: Organizing Space

Below is the way that I organize my materials per day in the classroom.

Reflection: By utilizing the bins per day of the week, I am able to plan accurately for what needs to be accommodated in each day. This allows me to put morning work in the clear bin next to the day, and any things I have planned for the following week can go directly under the day of the week indicating that is the future work. I never leave on Friday without having at least Monday and Tuesday of the following week in order in case of a necessary absence. This allows me to keep the environment clean and prepared.
