Dear Hiring Committee,

I have been deeply determined to educate those around me throughout my life and intend to keep things that way. I am enthusiastic and constantly seeking more information to help those around me. I have a strong interest in working in your district and with your wonderful students.

My journey in education began early. As a child, I organized tutoring sessions at my daycare, and throughout middle and high school, I embraced leadership roles, from leading band rehearsals to being section leader and percussion captain in high school, assisting with tutoring in music. These experiences have not only honed my teaching skills but have also instilled a sense of responsibility to uplift and guide those around me.

Transferring my teaching abilities to my experience at Franklin Regional School District in a second grade classroom was natural. I am adaptable and organized, offering many opportunities for assessment and social emotional learning within my classroom. A classroom culture that looks into creativity and critical thinking, as well as being a future-ready community member who can collaborate with others in an easy way, is one of my main goals as an educator. Life will come at these students fast and being ready for whatever their bright futures hold is my goal in building strong relationships that are integrated into innovative learning.

After working with people of all ages during my long time at several jobs, I have come to know well what young people do to learn best regardless of need in or out of the classroom. I have been determined to make my work environments welcoming and innovative, and by working with people of high-school age, I have realized many teaching styles that work great for people of all ages. I will bring a fresh understanding to any team that I am a part of and do not shy away from doing research and learning more in order to achieve what is necessary. From learning small amounts of ASL for a coworker who is hard-of-hearing, to helping coworkers figure out how to fix issues they're having in a fast-paced environment, I am not only open to learning new things but welcoming of these opportunities. I am certified through the Youth Mental Health First Aid team to accurately and appropriately respond to youth mental health crises which sets me above in classroom culture environments. I am also a member of Sigma Tau Delta, an English Honor's Society. This ability to work

between activities while maintaining my composure has made me an organized, professional individual.

I look forward to experiencing new and innovative learning opportunities with your community. The possibility of contributing my dedication, determination, hard work, and teamwork abilities is enticing and I hope that you see value in these skills as much as I do. I am eager to further discuss my interest at [Hannah.Hizer@gmail.com](mailto:Hannah.Hizer@gmail.com) and 724-708-5052.

Thank you,

Hannah Hizer
